

Canada-France comparative analysis

I. T.

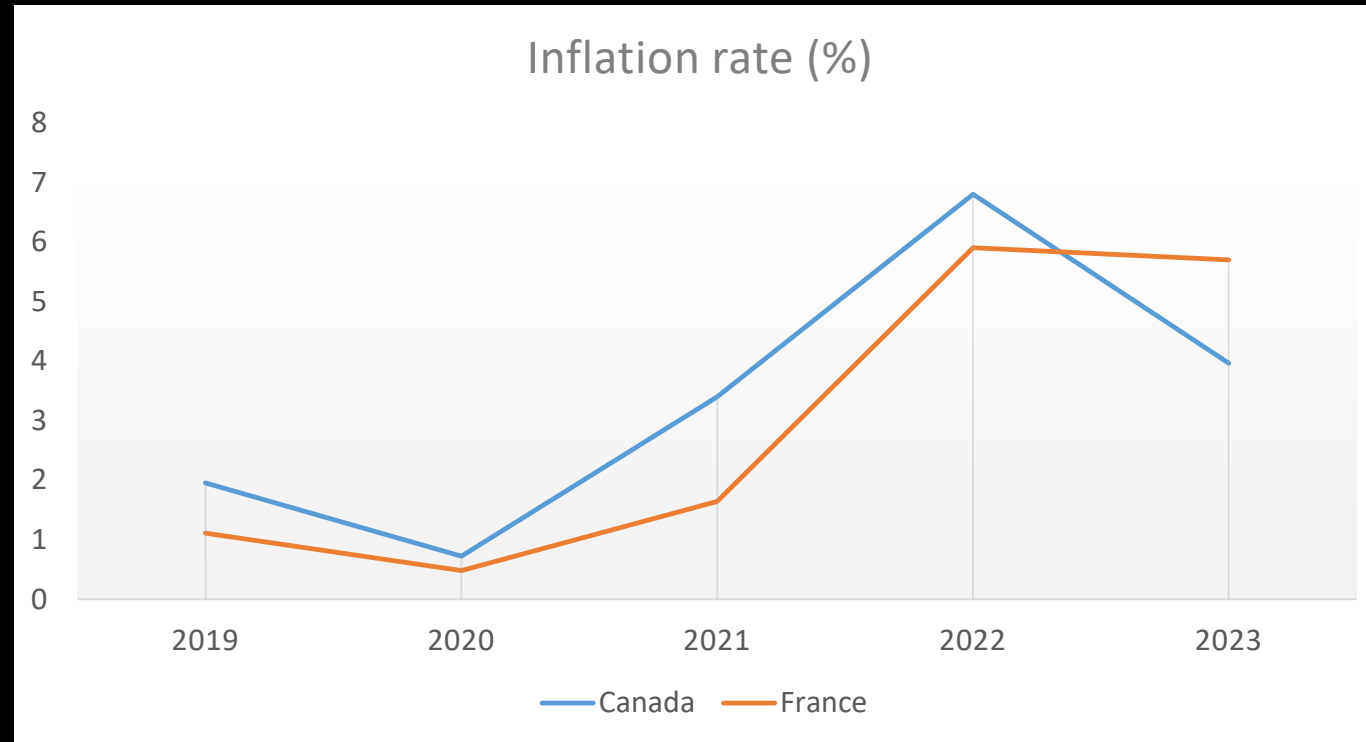

GDP

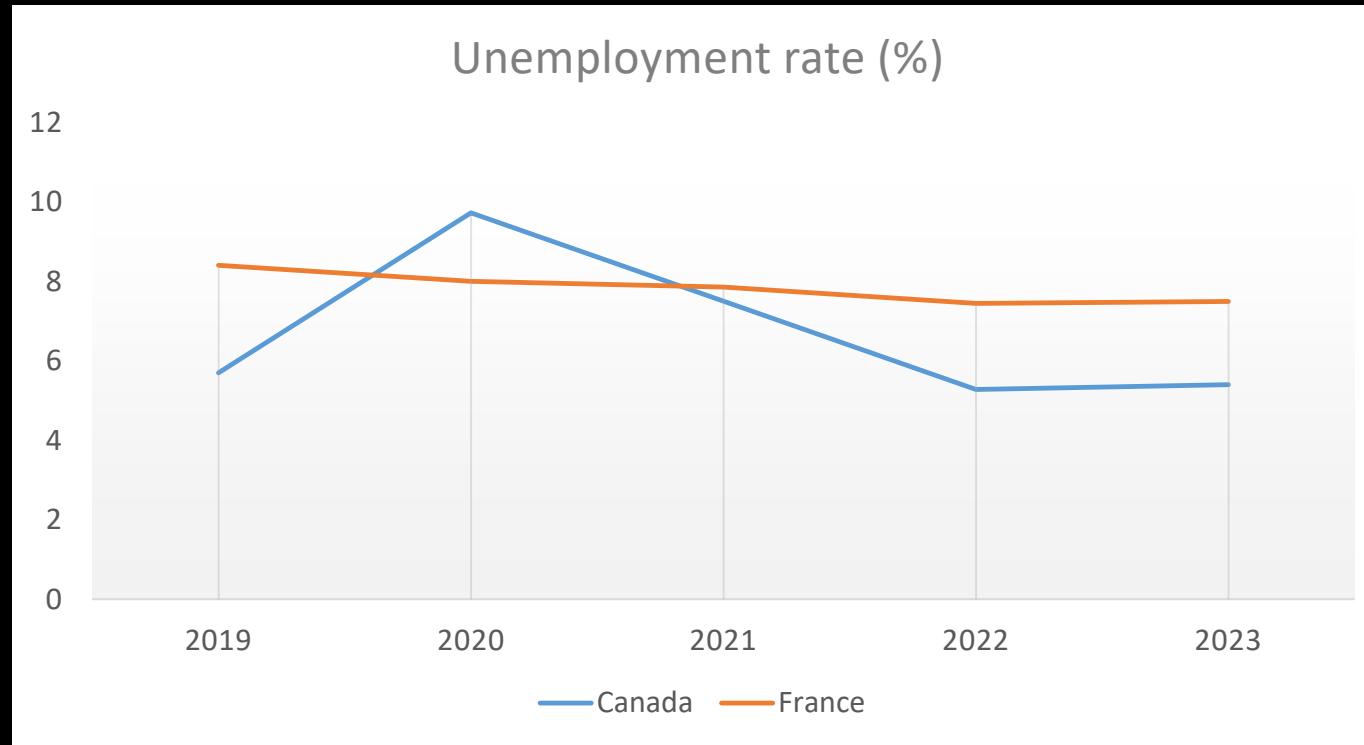

- ✓ France quickly recovered from the losses caused by the pandemic in 2020 thanks to the vaccine and the strong public support measures.
- ✓ The Canadian economy started growing again after 2023 because of strong demand for exports and goods and services from households.

Inflation rate

- ✓ In 2022, the main contributor to French inflation was food. Later in 2023, the inflation stabilised along with the consumer price index.
- ✓ After the pandemic, Canadian employers struggled to hire enough staff to catch up with the high demand. Hence, many businesses raised their prices significantly.
- ✓ Generally, the leading cause of inflation is the economic recovery efforts after 2020.

Unemployment rate

- ✓ Canada experienced a significant economic recession in 2020, when the lockdowns had taken place.
- ✓ Unemployment in France remains stable but is expected to increase in the future.
